(1) LTA=Long-Term Average

(2) Data available until the date of update

1. Output

Real GDP in the euro area continued growing in the first quarter of 2017. According to Eurostat's flash estimate (released on 16 May), it increased by 0.5% quarter-on-quarter (q-o-q), unchanged from the previous quarter. As compared to 2016-Q1, real GDP increased by 1.7% year-on-year (y-o-y). According to the **Commission's spring 2017 forecast**, released on 11 May, GDP growth is projected at 1.7% in 2017 and 1.8% in 2018. Private consumption is set to remain the main growth driver, benefitting from robust employment growth, though its growth is set to moderate as the pick-up in inflation weights on households' purchasing power. Investment growth has strengthened at the end of 2016 but going forward it is expected to be constrained by uncertainty and deleveraging pressures, despite favourable financing conditions.

In April 2017, the **Commission's Economic Sentiment Indicator** increased markedly (by 1.6 pts. to 109.6), resulting from strong increases in confidence in all sectors (industry, services, construction, and retail trade) and among consumers.

Increasing **industry confidence** (by 1.3 pts.) was driven by managers' more upbeat assessment of the current level of overall order books and healthier assessments of the stocks of finished products, whereas managers' production expectations remained broadly unchanged.

The final **PMI Composite Output Index** for the euro area rose to a 72-month high of 56.8 in April (from 56.4 in March). Output growth momentum strengthened markedly both in the service sector (PMI up by 0.4 pts. to 56.4) and in the manufacturing sector (PMI up by 0.5 pts. to 56.7).

In March, **industrial production** fell again by 0.1% month-on-month (m-o-m), which implied stagnation in the first quarter as compared to the preceding quarter. The sectoral breakdown showed the decrease was due to the production of energy decreasing by 3.2%, while the production of non-durable consumer goods rose by 2.1%, the durable consumer goods by 0.9%, the intermediate goods by 0.3% and the capital goods by 0.2%.

2. Private consumption

In 2016-Q4, the growth of **private consumption** increased to 0.5% q-o-q (0.3% in 2016-Q3) and contributed 0.2 pps. to GDP growth. With respect to the same period of the preceding year, private consumption was up by 1.9%. In April, **consumer confidence** increased markedly (by 1.4 pts.), resulting from significantly brighter expectations regarding future

unemployment, the future general economic situation and households' future financial situation. By contrast, consumers were less optimistic about their savings expectations.

In March, the volume of **retail trade** rose by 0.3% in the euro area compared to February, mainly driven by rises of 0.4% for non-food products and of 0.2% for "Food, drinks and tobacco", while automotive fuel fell by 0.3%. In April, **retail trade confidence** increased (1.4 pts.) due to more positive views on both the present and expected business situation, while managers' assessment of the adequacy of the volume of stocks slightly deteriorated.

3. Investment

In 2016-Q4, **gross fixed capital formation** increased by 3.3% (q-o-q) up from -0.2% in the third quarter, pushed by the strong increase in Ireland (accounting for 2.5 pps.). As compared to 2015-Q4, investment increased by 5.1% (Irish data accounting for 3.3 pps.). In 2017-Q2, the rate of **capacity utilisation** in the manufacturing industry (data collected in April) stood at 82.6% (0.1 pps. higher than in January), whereas capacity utilisation in the services sector remained unchanged at its highest level (89.4) in the history of the series (since 2011).

4. Labour market

In March, the **unemployment rate** was 9.5%, unchanged from February, and thereby at the lowest level since April 2009. Compared to March 2016, unemployment was down by 0.7 pps.

In 2016-Q4, seasonally-adjusted **employment** was 0.3% higher than in 2016-Q3 and 1.1% higher than in 2015-Q4. According to the Commission's survey results, in April 2017 **employment expectations** saw significant upward revisions in construction, retail trade, industry and services.

5. International transactions

In February, the **world trade volume** (goods) fell by 0.6% (m-o-m), following a 1.0% increase in January. In April 2017, views on **export order books in manufacturing** were more positive (-6.4 pts.) than in March (-6.9 pts.), and above the long-term average.

In March, the seasonally adjusted **trade balance** was in surplus at €23.1 bn, from €18.8 bn in February. The seasonally adjusted **current-account balance** also recorded a surplus in February (€37.9 bn). This reflected surpluses for goods (€29.5 bn), services (€9.5 bn) and

primary income (€4.2 bn), which were partly offset by a deficit in secondary income (€5.4 bn).

6. Prices

In April 2017, annual **HICP inflation** increased to 1.9%, up from 1.5% in March. Looking at the main components, energy had the highest annual rate in April (7.6%, up from 7.4% in March), followed by services (1.8%, up from 1.0% in March), food, alcohol and tobacco (1.5%, down from 1.8% in March), and non-energy industrial goods (0.3%, unchanged from March). **Core inflation** (all items except energy and unprocessed food) increased to 1.2% (up from 0.7% in March).

The **Commission's spring 2017 forecast** projects HICP inflation at 1.6% in 2017 and at 1.3% in 2018. According to the Commission surveys, **consumer price expectations** decreased by 1.4 pts. to 13.9 in April.

In March, **industrial producer prices** fell by 0.3% in the euro area compared with February, but they were 3.9% higher than in March 2016.

Brent crude **oil prices** have been volatile over the past months. Since late November, the OPEC agreement on how to implement production cuts had pushed the price, before price moderated somewhat. After dropping in early May to 48 USD/bbl, the Brent crude oil price reversed losses and moved up by mid-May to about 52.50 USD/bbl on the back of an agreement between Saudi Arabia and Russia to extend their oil production cuts into 2018. On 17 May, Brent crude traded at 52.20 USD/bbl. (corresponding to 46.96 EUR/bbl.).

7. Monetary and financial indicators

Money market interest rates have stabilised in recent months, remaining close to the ECB's deposit facility rate. On 17 May, the 3-month EURIBOR was at -0.331%.

At its meeting on 27 April, the ECB Governing Council decided to keep the key ECB **policy interest rates** unchanged, i.e. the interest rates on the main refinancing operations, the marginal lending facility and the deposit facility will remain at 0.00%, 0.25% and -0.40% respectively. It continued to expect these rates to remain at present or lower levels for an extended period of time, and well past the horizon of the Eurosystem's net asset purchases. Monthly asset purchases of €60 bn are intended to run until the end of 2017, or beyond, if necessary, and in any case until the Governing Council sees a sustained adjustment in the path of inflation consistent with its inflation aim.

Benchmark sovereign bond yields in the euro area had fallen to negative territory between mid-July and mid-September 2016, reflecting the search for safe haven debt as global uncertainty increased and the global growth outlook deteriorated. Since then, benchmark sovereign bond yields in the euro area have picked up, reaching 0.390 on 15 March.

The April 2017 **bank lending survey** showed that loan growth continued to be supported by eased lending conditions and increasing demand across all loan categories. In the first quarter of 2017, credit standards for loans to enterprises and to households eased slightly in net terms. Credit standards on loans to households for house purchase also eased broadly in line with banks' expectation of a further net easing. Credit standards on consumer credit and other lending to households eased further.

The annual rate of change of **M3** in March 2017 increased to 5.3%, from 4.7% in February. The annual growth of loans to the private sector (adjusted for sales, securitisation and notional cash pooling) stood at 2.7% in March (from 2.3% in February). The annual growth of adjusted loans to households stood at 2.4% in March (from 2.3% in February), and the annual growth rate of adjusted loans to non-financial corporations stood at 2.3% in March (from 1.9 in February).

At its meeting on 2-3 May, the **FOMC** decided to maintain the target range for the federal funds rate between 0.75% to 1.0%. It reiterated the strengthening economy would warrant gradual policy tightening over the medium term. On 16 May, the US 3-month Libor rate stood at 1.18%.

Since the second half of April, the **EUR/USD exchange rate** has risen significantly and reached in mid-May the highest rates since October 2016, supported by market perceptions of the outcome of the French elections and improving sentiment in the euro area. These factors added to others such as prospects for asynchronous monetary policy in the US and in the euro area.

Stock market indices in Europe joined the global rally following the US elections in November, which removed losses observed after the UK referendum. By 17 May, the EuroStoxx50 had gained around 25% since late June 2016. The Dow Jones index has posted strong gains since the US elections, hitting multiple record highs in early March; on 17 May, the index stood about 14% higher than in late October. In Japan, the Nikkei index also posted strong gains in late December; on 17 March, the index noted almost 33% higher than the 2016-year low.

KEY INDICATORS FOR THE EURO AREA

Euro area	Indicators as from 2011 refer to Belgium (BE), Germany (DE), Estonia (EE), Ireland (IE), Greece (GR), Spain (ES), France (FR), Italy (IT), Cyprus (CY), Latvia (LV), Lithuania (LT), Luxembourg (LU), Malta (MT), the Netherlands (NL), Austria (AT), Portugal (PT), Slovenia (SI), Slovakia (SK) and Finland (FI).	
Indicator	Note	Source
	1. Output	
Sentiment Indicator	The economic sentiment indicator is the weighted average (of the industrial confidence indicator (40%), the services confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%) and the retail trade confidence indicator (5%)). Data are seasonally adjusted.	DG ECFIN
Industrial confidence indicator	The industrial confidence indicator is the arithmetic average of the balances (%) referring to the questions on production expectations, order books and stocks (the latter with inverted sign) from the survey of manufacturing industry. The long-term average refers to the period as from publishing of the indicator up to now. Data are seasonally adjusted.	DG ECFIN
Services confidence indicator	The services confidence indicator is the arithmetic average of the balances (%) referring to the questions on business situation and recent and expected evolution of demand from the survey of services. The long-term average refers to the period as from publishing of the indicator up to now. Data are seasonally adjusted.	DG ECFIN
Industrial production	Monthly Industry Production Index (2010=100), NACE Rev.2, Total industry (excluding construction). Mom% and qoq% ch. are seasonally and working day adjusted, yoy% ch. are working-day adjusted.	Eurostat
Gross domestic product	Real gross domestic product at constant market prices (chain-linked volumes (2010), ESA 2010), EUR. Data are seasonally and working-day adjusted.	Eurostat
Labour productivity	Labour productivity defined as the difference between GDP growth and employment growth.	Eurostat
GDP divergence	Standard deviation of GDP growth rates of the euro-area Member States.	Eurostat
	2. Private consumption	
Consumer confidence indicator	The consumer confidence indicator is the arithmetic average of the balances (%) referring to the questions on the financial situation of households, general economic situation, unemployment expectations (with inverted sign) and savings; all over next 12 months. The long-term average refers to the period as from publishing of the indicator up to now. Data are seasonally adjusted.	DG ECFIN
Retail confidence indicator	The retail confidence indicator is the arithmetic average of the balances (%) referring to the questions on the present and the future business situation and the volume of stocks (with inverted sign). The long-term average refers to the period from publishing of the indicator up to now. Data are seasonally adjusted.	DG ECFIN
Private consumption	Real household & NPISH final consumption expenditure at constant market prices (chain-linked volumes (2010), ESA 2010), EUR. Data are seasonally and working-day adjusted.	Eurostat
Retail sales	Retail trade (NACE Rev.2 G47) excluding motor vehicles, motorcycles; Deflated turnover, mom% ch. and qoq% ch. are seasonally adjusted, yoy% ch. are working-day adjusted.	Eurostat
	3. Investment	
Capacity utilisation	In percent of full capacity in the manufacturing sector. Data are seasonally adjusted (collected in January, April, July and October).	DG ECFIN
Production expectations	Production expectations in manufacturing sector. Data are seasonally adjusted.	DG ECFIN
Gross fixed capital formation	Real gross fixed capital formation at constant market prices (chain-linked volumes (2010), ESA 2010), EUR. Data are seasonally and working-day adjusted.	Eurostat
Equipment investment	Gross fixed capital formation at constant market prices (chain-linked volumes, reference year (2010), ESA 2010), EUR, real machinery and equipment and weapons systems. Data are seasonally and working-day adjusted.	Eurostat
Construction investment	Gross fixed capital formation at constant market prices (chain-linked volumes, reference year (2010), ESA 2010), EUR, dwellings and other buildings and structures. Data are seasonally and working-day adjusted.	Eurostat
Change in stocks	Changes in inventories and acquisitions less disposals of valuables (at prices of previous year).	Eurostat
Profit share	Ratio of nominal gross operating surplus and gross mixed income to nominal GDP	Eurostat

KEY INDICATORS FOR THE EURO AREA

	4. Labour market	
Employment expectations (manufacturing)	Managers' employment expectations over the next three months in the manufacturing sector. Data are seasonally adjusted.	DG ECFIN
Employment expectations (services)	Managers' employment expectations over the next three months in the services sector. Data are seasonally adjusted.	DG ECFIN
Employment expectations (whole economy)	Weighted average of managers' employment expectations over the next three months in the manufacturing (19%), services (65%), construction (6%) and retail sectors (10%). Weights in brackets according to value-added share on GDP of the respective sector. Data are seasonally adjusted.	DG ECFIN
Employment	Total domestic employment (number of persons). Data are seasonally adjusted for Ireland, Greece, France, Cyprus, Malta, Netherlands, Portugal and Slovakia, and seasonally and working day adjusted data for the remaining Member States.	Eurostat
Compensation of employees per head	Nominal compensation of employees divided by the number of employees. Data are seasonally and working-day adjusted.	DG ECFIN
Unemployment expectations	Consumers' unemployment expectations over the next twelve months. Data are seasonally adjusted.	DG ECFIN
Unemployment rate	Harmonised unemployment rate (in percent of labour force), ILO definition. Data are seasonally adjusted.	Eurostat
Structural unemployment rate	Non-accelerating inflation rate of unemployment. Data are seasonally adjusted.	DG ECFIN
Total labour costs	Nominal wage- and non-wage costs less subsidies in the private business sector. Data are seasonally and working-day adjusted.	Eurostat
Wage costs	Nominal wage and salary costs include direct remuneration, bonuses, and allowances, payments to employees saving schemes, payments for days not worked and remuneration in kind. Data are seasonally and working-day adjusted.	Eurostat
Non-wage costs	Nominal non-wage costs include the employers' social contributions plus employment taxes less subsidies. Data are seasonally and working-day adjusted.	Eurostat
Labour productivity	Ratio between GDP and employment. Data are seasonally and working-day adjusted.	DG ECFIN
	5. International transactions	
World trade	Volume, 2010=100, seasonally adjusted	CPB
Export order books	Managers' export order expectations in the manufacturing sector. Data are seasonally adjusted.	DG ECFIN
Extra-euro area exports	Nominal extra-euro area exports of goods, fob. Data are seasonally adjusted.	Eurostat
Extra-euro area imports	Nominal extra-euro area imports of goods, cif. Data are seasonally adjusted.	Eurostat
Extra-euro area trade balance	Difference between extra-euro area exports and extra-euro area imports. Data are seasonally adjusted.	Eurostat
Intra-euro area trade	Nominal intra-euro area trade in goods, fob. Data are seasonally adjusted.	Eurostat
Current-account balance	Transactions in goods and services plus income and current transfers between residents and non- residents of the euro area. Data are seasonally and working-day adjusted.	ECB
Exports of goods and services	Exports of goods and services at constant market prices (chain-linked volumes, reference year 2010), EUR. Data are seasonally and working-day adjusted.	Eurostat
Imports of goods and services	Imports of goods and services at constant market prices (chain-linked volumes, reference year 2010), EUR. Data are seasonally and working-day adjusted.	Eurostat
Direct investment	Nominal transactions/positions in assets abroad by euro-area residents less nominal transactions/positions in euro-area assets by non-residents. To be regarded as a direct investment, ownership in an enterprise must be equivalent to more than 10% of the ordinary shares or voting power.	ECB
Portfolio investment	Nominal transactions/positions in securities (including equities) abroad by euro-area residents less nominal transactions/positions in euro-area securities (including equities) by non-residents. To be regarded as a portfolio investment, ownership in an enterprise must be equivalent to less than 10% of the ordinary shares or voting power.	ECB

KEY INDICATORS FOR THE EURO AREA

	6. Prices	
HICP	Harmonised index of consumer prices (index 2015=100)	Eurostat
Core HICP	HICP excluding energy and unprocessed food (index 2015=100)	Eurostat
Producer prices	Domestic producer price index, total industry excluding construction (index 2010=100)	Eurostat
Selling price expectation	Managers' selling-price expectations in the manufacturing sector. Data are seasonally adjusted.	DG ECFIN
Import prices	Import price index, manufacturing (index 2010=100)	Eurostat
Oil prices	Price of north sea Brent in USD/barrel and EUR/barrel	ICE
Non-energy commodity prices	Market price for non-fuel commodities in EUR terms (index 2010=100)	HWWI
	7. Monetary and financial indicators	
Nominal interest rate (3-month)	3-month EURIBOR interbank rate (360 days)	ECB/ Global Insight
Nominal interest rate (10-year)	10-year interest rate on government bonds for euro area (based upon the 10-year German government bond)	ECB/ Global Insight
ECB repo rate	Minimum bid rate of main refinancing operations, end of period.	ECB/ Global Insight
